New York, New York

Web Designer with years of experience in application/web dev with a focus in artist sites and porfolios using a past of QA experience to create seamless and enjoyable UX/UI.

Experience

June 2021 - Present

Freelance
Web Designer
- Develop, maintain, and optimize responsive websites across multiple platforms, blending immersive visual design with technical functionality.
- Troubleshoot and resolve technical issues, ensuring optimal site performance, accessibility, and cross-browser compatibility.
- Provide ongoing technical support, maintenance, and content-focused updates for live websites.
- Implement SEO-friendly, mobile-first layouts with optimized load performance and interactive micro-animations.
- Manage multiple projects with flexibility and reliability, consistently meeting deadlines in fast-paced, evolving environments.

June 2019 - June 2025

Plus QA
QA Engineer II
- Served as the primary QA lead for Robinhood Legend, a new browser day-trading application, ensuring high-quality releases and a seamless user experience.
- Drove 12 major feature releases within an accelerated eight month timeline by collaborating closely with developers, product managers, and designers to proactively identify and resolve issues.
- Adapted swiftly to evolving product updates and maintain agile testing workflows, accommodating rapid development cycles and ensuring thorough test coverage.

June 2018 - June 2019

Frazer Computing
Support Technician
- Maintained an expansive and specialized knowledge about the software in order to suit the needs of any client. Provided clear and concise support for all customers/dealerships with installation, configuration, and troubleshooting of software solutions within the CRM within SLA requirements.
